Offer you a Common=Sense Catalogue with Reasonable Prices.

## A FEW SINCERE WORDS

$\prod O$ all of our friends and customers worthy salesman; but let us say to all to whom this price list may come: You cau compare our catalogue and prices, but we prefer you to compare our stock. It is of the same standard you have always had from us, and, though the crop of plants is short this year, the quality of plants is short this year, the quanty
is up to the standard. It is true our catais up to the standard. It is true our cata-
logue is not overdrawn, but as brief as logue is not overdrawn, but as brief as
possible, to save paper, time, and space, possible, to save paper, time, and space, but it will tell you r
what we have to sell.

We appreciate the increase of business, friends, and customers that each year has given us, and trust that we may merit a continuauce of your patronage, the same as in the past, for our plants and treatment must please you.
We hope to be favored with a part or all of your order.

> J. G. PRESTAGE \& SONS

## A FEW HINTS

Prepare your ground for your plants. When they arrive, set them immediately. It impossible to do this, heel them in It impossible to do this, heel them in damp earth by cutting the bands aromnc each bunde and covering with earth up to the crown of each plant, so that
roots come in contact with the dirt.

Varieties of Strawberries marked (P) are pistillate. or imperfect, blossoms and need be set uear (five to fifteen feet) staminate or perfect blossoms. The staniinate varieties have pollen to spare, and thus pollenize the imperfect blossoms and insure a good crop. Varieties marked (S.) need not have (P.) varieties near them, but (P.) varieties must be pollerrized by staminates.

Shipment-The general way of shipping plants and trees is by express. The rate is one fifth cheaper on plants than other articles. Purchaser pays all express charges. Parcels post is very convenient for those who live out of town, but on large shipments requiring more than ont package the cost is more because of it of a lot shipment.

Many firms are trying to entice trade by offering to pay all transportation charges, both post and' express. It is our candid opinion that this practice is a very unfair one, specially for all customers living within the first four zones on both express and post. The near cas tomer pays the same price as the faz one. Thus the far customer gets higin transportation charges paid for the lons distance, which really makes his stock cost very much less accordingly, while the near customer pays the same whose transportation charge is less, a half less or even more, so that the not cont wn or ever more, near customer is one hird to ona lialf the transportation charges more ; in otser the trallsportation charges more: words, the near customer helps pay tione It is a bit unfair, so we say customer
pays all post and express chares. On parcel post we pay or allow 10 c on evers order and seud the order collect. Thus we prepay for you and you can return the amount of charges to $u \mathrm{~s}$. The 10 c we allow on each order pays tor return charges. This is on post alone, because all postage must be prepaid. By this system there is no unfairness nor stuaying nor guessing at rates, zones, etc. It ing nor guessing at rates, zones, etc. It safest cheapest, and the least trouble.
Claims Wini Not be allowed unless made within five days after receivins plants or trees.

Substituting-We do not aim to sulsstitute withou your permission. So please state second choice when you order, or tell us whether we should substiture. TVhen the matter is not mentioned witit your order we construe that as giving consent for us to substitute. Many times we will over-sell on some kinds and have Usuountiful supply of other, varietie. Usuany there are several varieties tia are very much alike, where one lrind can be used equally well as another. Again, some other season may see conSo, try as hard as we may, we can not always plant or grow or contract for exalways plant or grow or contract for exactly the demands, specially where our plans are laid one year in advance. We customers, and usually succeed in hight, pleasing ninety-nine per cent. of them. We Specialize on Strawberry Plants and Grapevies
Our ${ }_{1}$ rices are not the lowest but are s low as we can carefully grow, dig, and pack right. We know of dozens of firms that are buying practically all the plants and trees they can handle-huy anywhere of any one, as cheap as they can, the cheaper the better, so they can sell cheap. The real values $n$ ne plants and trees and whubs are usually determined by amo the surest that the best are the cheapest. no matter what they cost,

Another Thing-Many people judge a firm by the bombast, smooth flattery of themselves, red pictures, and expensive catalogues. Our exnerience tells us, and We can prove that we are right, that those people are raising very little thar they advertise and offer for sale. We are Farmers -Nurserymen -Growers, work in the fields and grow our stone during spring. summer. and autumn. We part., cultivate. fertilize, dig. grade. and wack vell you

## STRAWBERRY PLANTS

We are growing and listing only the best varieties. It is a waste of time and money to botlier rith those of less value
Premier ( S. ) -Premier is now recognized as the peer of early berries by leaw ing growers over the conntry. In fact we have found it so ar sperior to any other variety that we have discarded all other parly kinds and are nffering only the Premier to mur trade. This superinrity is due to the fact that the Premier is hr several days the earliest ripening the on now grown and possesses none of the on-
jectionable features of other early va rieties such as poor color, green tlps. sinall size, poor flavor and freezing ox blossoms.

The blossoms of the Premier are su nearly frost proof that the danger of freezing is negligible. We have know, Premier to withstand frosts that voma entirely ruin the later varieties. The vines bear an enormous crop of large, anitiorm sized berries, while the berry ${ }^{\text {Is }}$ bright red clear to the center, is perfect in shape, and ripens without green tips. The fruit preseuts a very pleasing ap pearance on the market and possesses a flavor equal to the later varieties, which is very unusual in an early berry. Ripening a week to ten days ahead of other kinds, it matures the best part of irs crop while prices are at the peak which spells profit to the grower. The planis are sturdy, healthy, and long rootea, making them drought resistant. The folfage is a beautiful dark greent and very abuudant.

Since first offering this excellent $\nabla a$ riety our sales on it have doubled eacu year and we cannot urge you tho strongly

Sample (P.) - Another late variety; one of the best; large berry, good cropper, canner, and shipper.

Gandy (S.) - A reliable large, late berry; round, firm, fair quality, good shrpper; the latest variety grown.

Mized Plants for a Good Crop (S. ana P.)-Plants that have been mixed by mistake or are odds and ends of rows of different varieties. Couldn't make a better purchase than theso.
Brandywine (S.) -To be frank, this is one of the best medium late kina. better than Kellogg's Prize or Chesapeake; a good plant maker: berries of grood quality, good size; good shippers, and a heavy bearer.
Senator Dunlap (S.) --"Hats off to tro Dunlap." It is the best berry grown. Medium early to mid-season: best onality; heavy bearer; good plant maker stands drouth and frost, and
is the kind for everyone to set.
Uncle Jim (S.) - A very fine "classy" berry- best quality for table or nea
ket. Liked by all. Medium to late.

Warfield (P.) - The most highlv-prizea of all the varieties of sirawherry for canning and preserving purposes. It. like Dunlap is standard the world over. Dark red, heavy yielder. Medium early.

Dr. Burrill (S.)-"The Million Dollar Strawberry.' Claimed by the Kellogg people, of whom we secured nur plants, people, otter than Dunlan which it resembles, and it is a good one.

Gibson (S)-Oue of the most profit able sorts for both home garden and marKeting, piants very strong growark glos sy red. Medium.

Cooper (S)-Of this new berry we have a few plants to offer at a sliochtly higher rate than of others. A big rea berry that is productive, ahle berry to grow.

It has a wonderful root system, is a very strong male plant. In fact we think it one of the best berries in our trial that has been introduced. Medium season.

Eaton (S.) - Another recent introauction that is becoming very popular over the country. The plant is medium large the country. The plant is medium large in size and is a nice clean, thrifty grow.
er. Foliage has a tendency to be upright, er. Foliage has a tendency to be upright, holding the fiult from the ground, when is a desirable feature. Berries are deep red in color, conical in shape, and of great size, holding their shape and size
well until the end of the season. Fruit is firm and will stand much rough hanuling, making it an excellent shipper. We recommend the Faton as a valuable mar. ket or home garden variety.
Bubach (P.) -Fruit large and handsome, roundish to conical, bright scarlet in color, moderately firm, of good qual. ity; plant is a strong grower, with large, healthy, dark green foliage and very productive. Requires a rich soil, inclined to be heavy; very deslrable for home use or be heavy; very desirable for home use or near market; an old stand-by and in demand because of its size, colo ways in demand because of its size, colas protices the required number of plants for a desirable row.

## EVERBEARING STRAWBERRIES

The Everbearing varicties are all strong staminate and may be used to fertilize pistillate varieties.

Champion-For the past seven years the Champion has been widely planted throughout the fruit growing centers of the country and is generally recognizea as the leading Everbearer of today. The Champion bears lare quantities of medcum larae bervies, uniformly conical in shape, and $a$ beautiful dark red to the shape, and a flavor they surpass any June center. In flavor they surpass any June bearing variety and are excellent for serviug fresh from the vines or Champion is one ning or preserving. The Champion is one of the first beriles to ripen in the spring and the last to ripen in the fall. The first crop is borne at regular fruiting wears in June. Then atter a rest of three weems the plants throw out new fruit stems and will continue blossoming and maturing fruit until freezing weather. The plants are large, healthy and vigorous. No garden should be without some of the Everbearers and any farm can add to its Hcome by planting Everbearers for the fall berry crop which sells readily at 30 c to 40 c a quart.
Mastodon-A recent Everbearing introduction that we are offering this seaso. for the first time. Many growers are very enthusiastic over this variety ana claim wonderful things for it. From our own observation we have found it to be a good producer of large red berries, but do not consider the flavor equal to the Champion. It is a strong, vigorous grower, hardy, and makes many more unners than other varieties of Everbearers. It will produce more and Iarger ber-
ries than the Champion and will malke a good stand of new plants.

## BLACKBERKIES

Eldorado-A valuable blackberry for our northern climate. The berries are large, jet black, ripen well together ana are borne in large clusters: they are sweet and delicious, have no hard core, and keep well after picking. None better for any where or any purpose: 25 plants $50 \mathrm{c} ; 50, \$ 1 ; 100, \$ 2 ; 250$. $\$ 4.50: 500$ plants $\$ 8 ; \mathbf{1}, 000, \$ 16$.

## RED RASPBERRIES

King-Early, thrifty, heavy bearer. good quality, good shipper, largely prantd. 25 plants $50 \mathrm{c} ; 50, \$ 1 ; 100, \$ 1.50$; $250, \$ 3.25 ; 500, \$ 6.50 ; 1,000, \$ 12$.

Cuthbert-Queen of the market, one of the largest: good quality, good shopper, very prolific; grows anw where: zo
plants 75c, $50, \$ 1.25 ; 100, \$ 2.00 ; 250$ $\$ 4 ; 500, \$ 8 ; 1,000$. $\$ 15$.
Latham Red Raspberry - This new berry originated in Minnesota, and is one of the largest grown, elaimed by Minnesota Agricultural college to be tne best variety known. With us it is very heavy yielder of large crimson-rea berrios Growers are all pinsed with berries. Growers are all pleased with \$18: $500 . \$ 10$, 250 your reach- $\$ 5.000$, 50, $\$ 1.50 .25, \$ 1$. $\$ 5.50$, $100, \$ 2.75$. $50, \$ 1.50 ; 25, \$ 1 ; 10,50 \mathrm{c}$.
Columbian Purple-A cross between the Red and Black raspberry. It takes to the nature of the red raspberry in fruit and the black raspberry in canes. Fla vor decidedly favors the red raspberry. Berry is large. A very heavy bearer Becoming more popular each year. We like it best of any raspberry for homo use. Price- $1,000, \$ 28: 500, \$ 14: 250$ $\$ 8 ; 100, \$ 3.75 ; 50, \$ 2 ; 25, \$ 1.25$ $10,75 \mathrm{c}$.

Cumberland-Black Raspberry. Thw best black raspberry for home use, market, and canning factory. Hardy, a $\$ 11 ; 250, \$ 6 ; 100, \$ 3 ; 50, \$ 2 ; 25$. $\$ 1$.

## CURRANTS AND GOOSEBERRIES

Red London Market-The heaviest bearer known; medium size, healthy bushes, largely planted.

Fays Prclific Red-Good.
Wilder-Large, red, desirable.
White Grape-White, not very sour.
Prices of two-year plants, each 20c: IU for $\$ 1.25$; 25 for $\$ 2.50$; 50 for $\$ 4 ; 100$ for $\$ 7$.

Downing Gooseberry-Best large white Price 2-year plants each $25 \mathrm{c}, 10$ for $\$ 2$ 25 for $\$ 3.25$, 50 for $\$ 5$; 100 for $\$ 9$.

Houghton-Best red gooseberry. Price three-fifths that of Downing.

## ASPARAGUS ROOTS AND SEED

No farm nor garden is complete without it, and truly it is very little troubie or expense to raise. When it comes ro profit, from one to four acres will produce more net returns than the averaso 80 -acre farm. The market has always been short of a good supply. We offer the best two large varitties only
Webbs Improved Palmetto-2.year roots, 25 for $50 \mathrm{c}, 50$ for $75 \mathrm{c}, 100$ for $\$ 1,250$ for $\$ 2.25,500$ for $\$ 4,1,000$ for $\$ 7$.

Palmetto Seed-Three pounds for $\$ 2$ 1 pound for $75 \mathrm{c}, 1 / 2$ pound 40 e , $1 / 4$ pound 25 c.

Mary Washington-The new grane rust-resistant. Two-year roots 25 for 75 c , 50 for $\$ 1,100$ for $\$ 1.25,250$ for $\$ 2.50$ 500 for $\$ 5,1,000$ for $\$ 9$.

Washington Seed-5 pounds $\$ 6$,o pounds $\$ 4$, one pound $\$ 1.50$, 1/2 poun s5c, $1 / 4$ pound 50 c

Wo have millions of roots. Will make a discount an large orders. Write us.

One-gear roots at $3 / 4$ the price of two years.

## A PERMANENT INCOME

Can be had by setting from one to five acres of Asparagus. The growing demand fresh for table use and the canning factories offering long term constracts has increased the demand far beyond the supply. Incomes of $\$ 300$ to $\$ 800$ per acre are being made yearly in the PawPaw, Mich. district. It is easy to grow and keep clean, easy to harvest and the income is sure and early in the season. come is sure and early in the season. Asparagus is one of the spring. If fruit freezes all grow in the spring. If fruit freezes all the better for asparagus it grows up in a few days. We have a millinn rite for prices on large orders for a permanent income.

Prices of all beans- $1 / 2 \mathrm{lb} 15 \mathrm{c}, 1 \mathrm{Ib}$ $25 \mathrm{c}, 5 \mathrm{lbs} . \$ 1.10$

What Are Good Plants and Trees?
A customer may have several catalogues to choose from. Some will claim their plants are the best. It is true that usually not the largest plants, shrubs, or trees are the best, yet it is equally true that it is not the smallest plant; yet smal plants many times do better than large ones. The plant with a medium size to and well developed root system, raised on soil or fair fertility, is the best plant, as we have learned by experience. Planis grown on rich soil should not be reset on poor soil and expected to do well. Many nurserymen grow their plants on soll too rich for the good of the buyer who sets them on medium soil. We have found, tou, that plants grown under irrigation are generally poor plants for the average buyer.

We believe that, considering our ex perience, lifelong, in the fruit. plant, ane mursery business, and our ideal soil and good care, that our plants are as good or better as any grown in Michigan or any other place. Many of our friends anc customers tell us ours are the best plants they ever bought, and we have many testimonials to that effect

## Where Will You Buy?
